

Regenerative Farm Workshops for New Agrarians at Light Root Community Farm

1. Managing a Small Scale Grass-Based Dairy : Saturday April 22nd 9:30am-2:00pm

A small-scale dairy can provide diversity, fertility, and an economic niche market to a small farm. Join us for this introductory workshop diving into the art and science of small scale dairy management.

We will cover basic principles of natural dairy cow management, milking facilities, equipment and procedures, cow health, milk testing and quality standards, and Raw milk Herd Share regulations in Colorado.

The workshop will also give an overview of regenerative on-farm fertility systems, including rotational grazing and manure management with on-farm compost production.

Fee: \$60.00

****Scholarship funds available for new and beginning farmers with support from the Colorado Department of Agriculture. For more information or to register for this workshop Email: Lightrootfarm@gmail.com***

*** Seasoned Farmers looking to learn new skills are always welcome to participate too!**

Light Root Community Farm is a biodynamic farm based in Boulder, CO and operates a small 100% grass-based dairy, offering raw milk herd shares to approximately 200 families. Instructor Daphne Kingsley has 17 years of experience operating grass-based micro-dairies in Wisconsin and Colorado. She enjoys talking about all things cow and sharing her experience and knowledge of small dairy farming with aspiring farmers.
